Vehicle Idling Measurement Form

Thank you for helping ***(Name of organization)*** *conduct this program to better understand and influence idling in school zones. If this program is successful it will improve air quality and the health of children.*

Instructions:

- For morning measurement, begin 30 minutes before classes start and continue measuring 20 minutes after classes begin.
- For afternoon measurement, begin 30 minutes before classes end and continue measuring 30 minutes after classes end.
- Watch for visible exhaust fumes, engine noise, vibrating tail pipe or exterior lights to assess if vehicle is idling.

Please fill out the information below at the start of each session.

school name:_____ date _____ start time_____ end time_____
weather (cloudy, rainy, sunny):_____

Vehicle type (car, truck, SUV, minivan, full-size van, bus)	Idling time (in Min & sec.)	Driver's gender	# people in car	In-car activity (reading, watching for child, listening to radio, etc.)
TOTAL IDLING TIME				

It All Adds Up to Cleaner Air

Vehicle type (car, truck, SUV, minivan, full-size van, bus)	Idling time	Driver's gender	# people in car	In-car activity (reading, watching for child, listening to radio, etc.)
